# JS

JavaScript is Everywhere

JavaScript

- JavaScript is most commonly used as a client side scripting language.
- It is an object-oriented computer programming language commonly used to create interactive effects within web browsers.
- The programs in this language are called scripts. They can be written right in the HTML and execute automatically as the page loads.
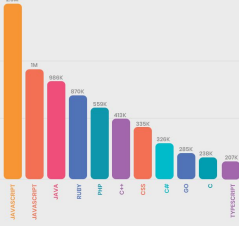

Features of JavaScript

		JS		
Light Weighted			Object Based Scripting Language	
Scripting Language			Client Side Technology	
Interpreter Based			Looping Statement	
Event Handling			In-Built Function	
If...Else Statement			Control Statement	
Validating User's Input			Case Sensitive
