

128 TECHNOLOGY

Don't build your new SD-WAN on 20th century technology

Session Smart™ SD-WAN

↑ More performance at a lower price ↓

ACG Research recently helped quantify the economic benefits of Session Smart™ SD-WAN, powered by 128 Technology.

Here's what they found:

No overlays = No wasted bandwidth

30% savings vs. traditional SD-WAN
from elimination of bandwidth-hungry tunnels

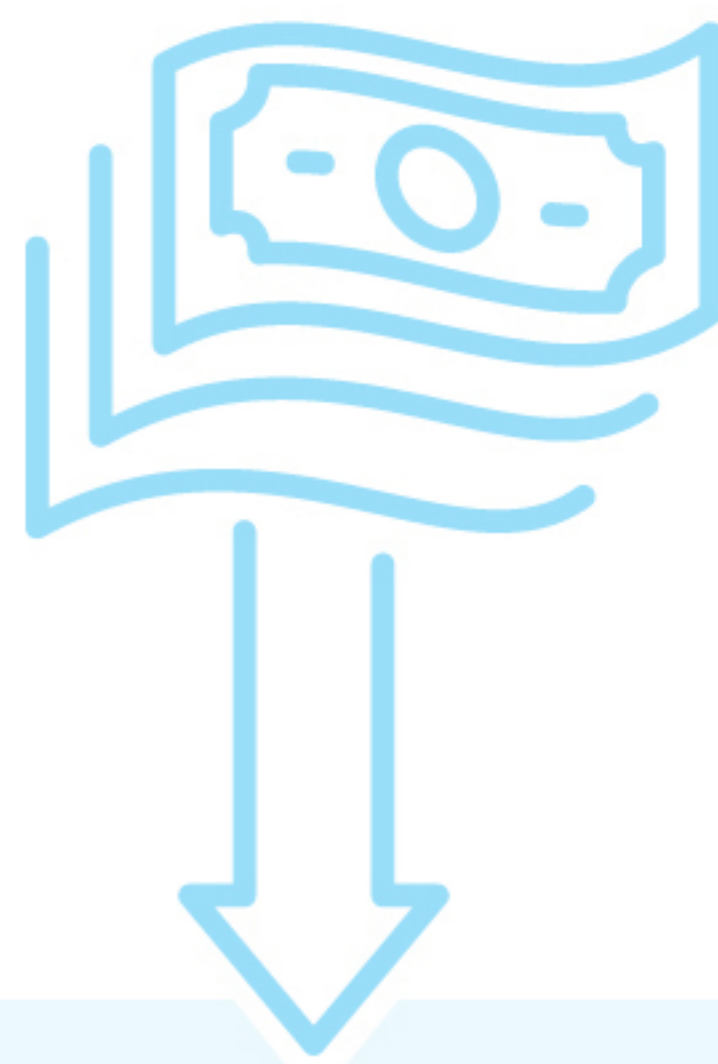

In the cloud?

Slashing those data transfer expenses looks even better

No paying for network capacity you're not using

82%

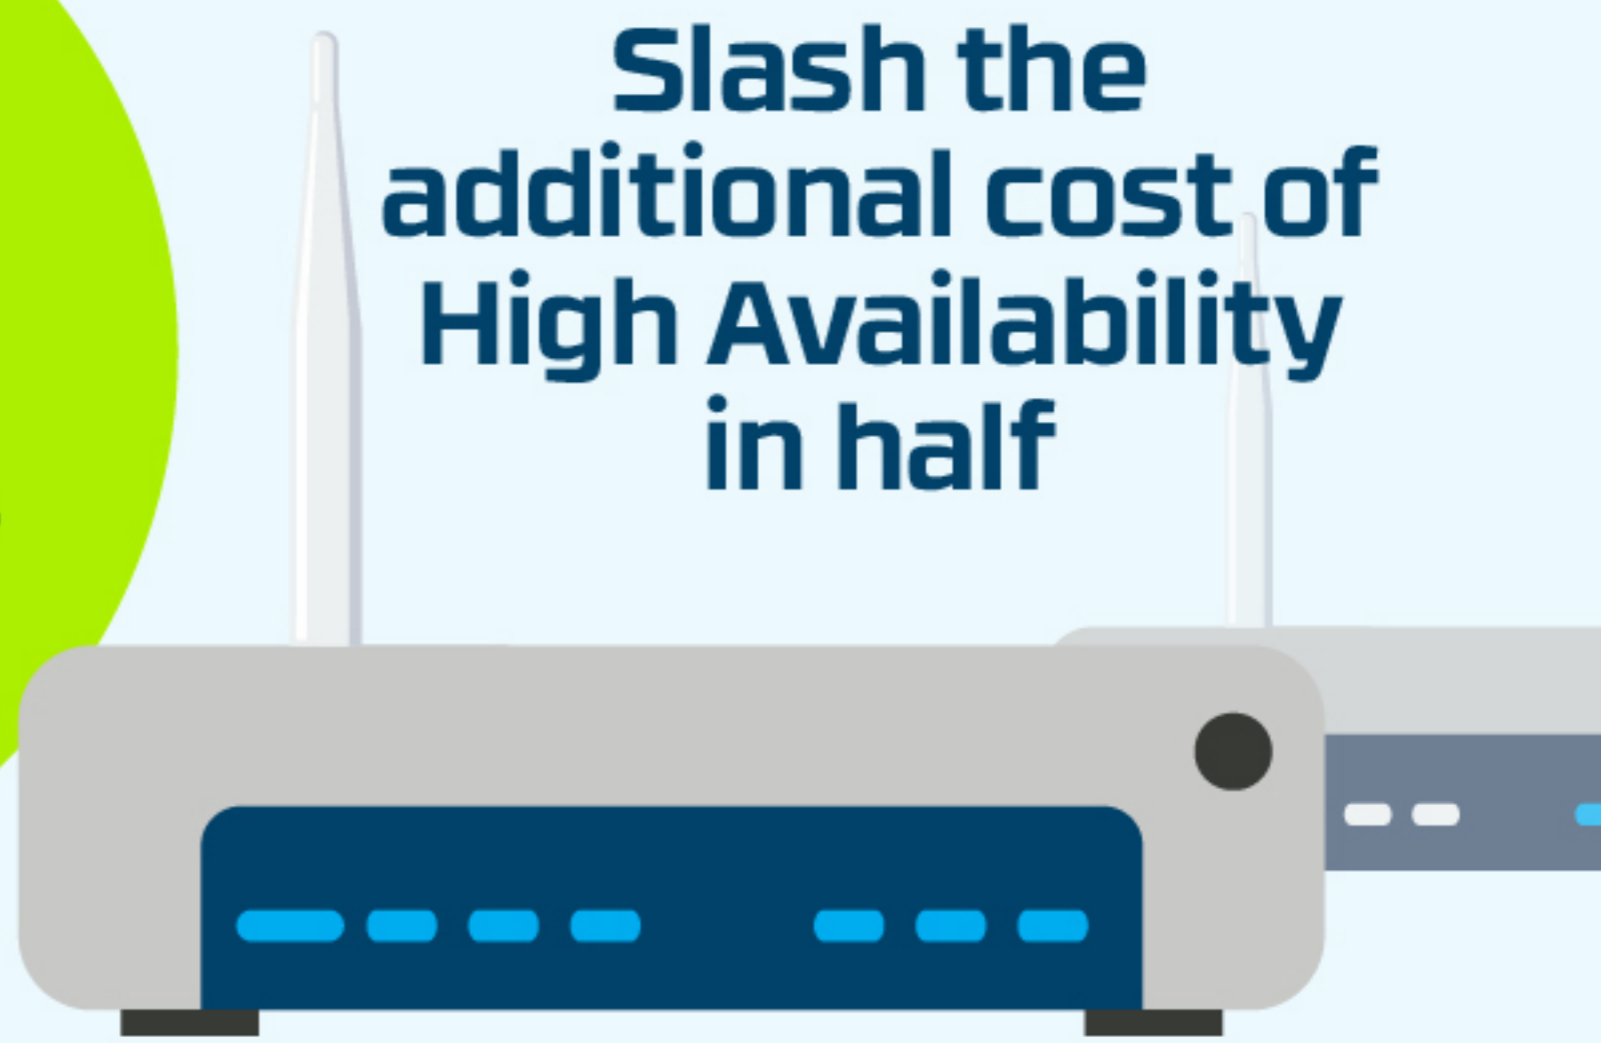

Savings from the end of costly over provisioning

50% HA cost

Sub-second failover makes an unused back up router even more unnecessary

Slash the additional cost of High Availability in half

Automate tedious administrative tasks

Intelligent network management lets engineers **spend less time** on ACLs, more time focused on the business.

End Redundant Encrypting

Secure traffic at the right encryption level for each network session.
So why pay twice?

Want more reasons why you need Session Smart™ SD-WAN?
Great. We've got tons.
