

Choosing a **CLOUD MIGRATION STRATEGY**

With businesses taking ever-increasing amounts of their workloads into the cloud, an effective cloud migration strategy becomes essential. Whichever strategy companies choose for the migration, it needs to minimise disruption to applications and remain within a feasible budget for it to work successfully.

83% of enterprise workloads will be in the cloud by 2020.

41% of enterprise workloads will be run on public cloud platforms (e.g. Google Drive, Microsoft Azure) by 2020.

On-premise workloads, which stood at 37% of all workloads at the beginning of 2018, are projected to reduce to **27%** by 2020.

The digital transformation of businesses is the leading factor behind increased engagement in public cloud, with **63%** of companies believing this to be significant.

53% of workers predict that, by 2022, **95%** of all workloads will run in the cloud.
