

Cybersecurity

for Enterprises

The risks and rules criminals don't want you to know.

Cybercrime Statistics (2018-19)

CYBERATTACKS:
32% involved phishing

DATA BREACHES:
31% led to Identity theft

CYBER READINESS:
74% unprepared

Cybercrime Damages

Global cost predictions.

The Costs to Enterprises

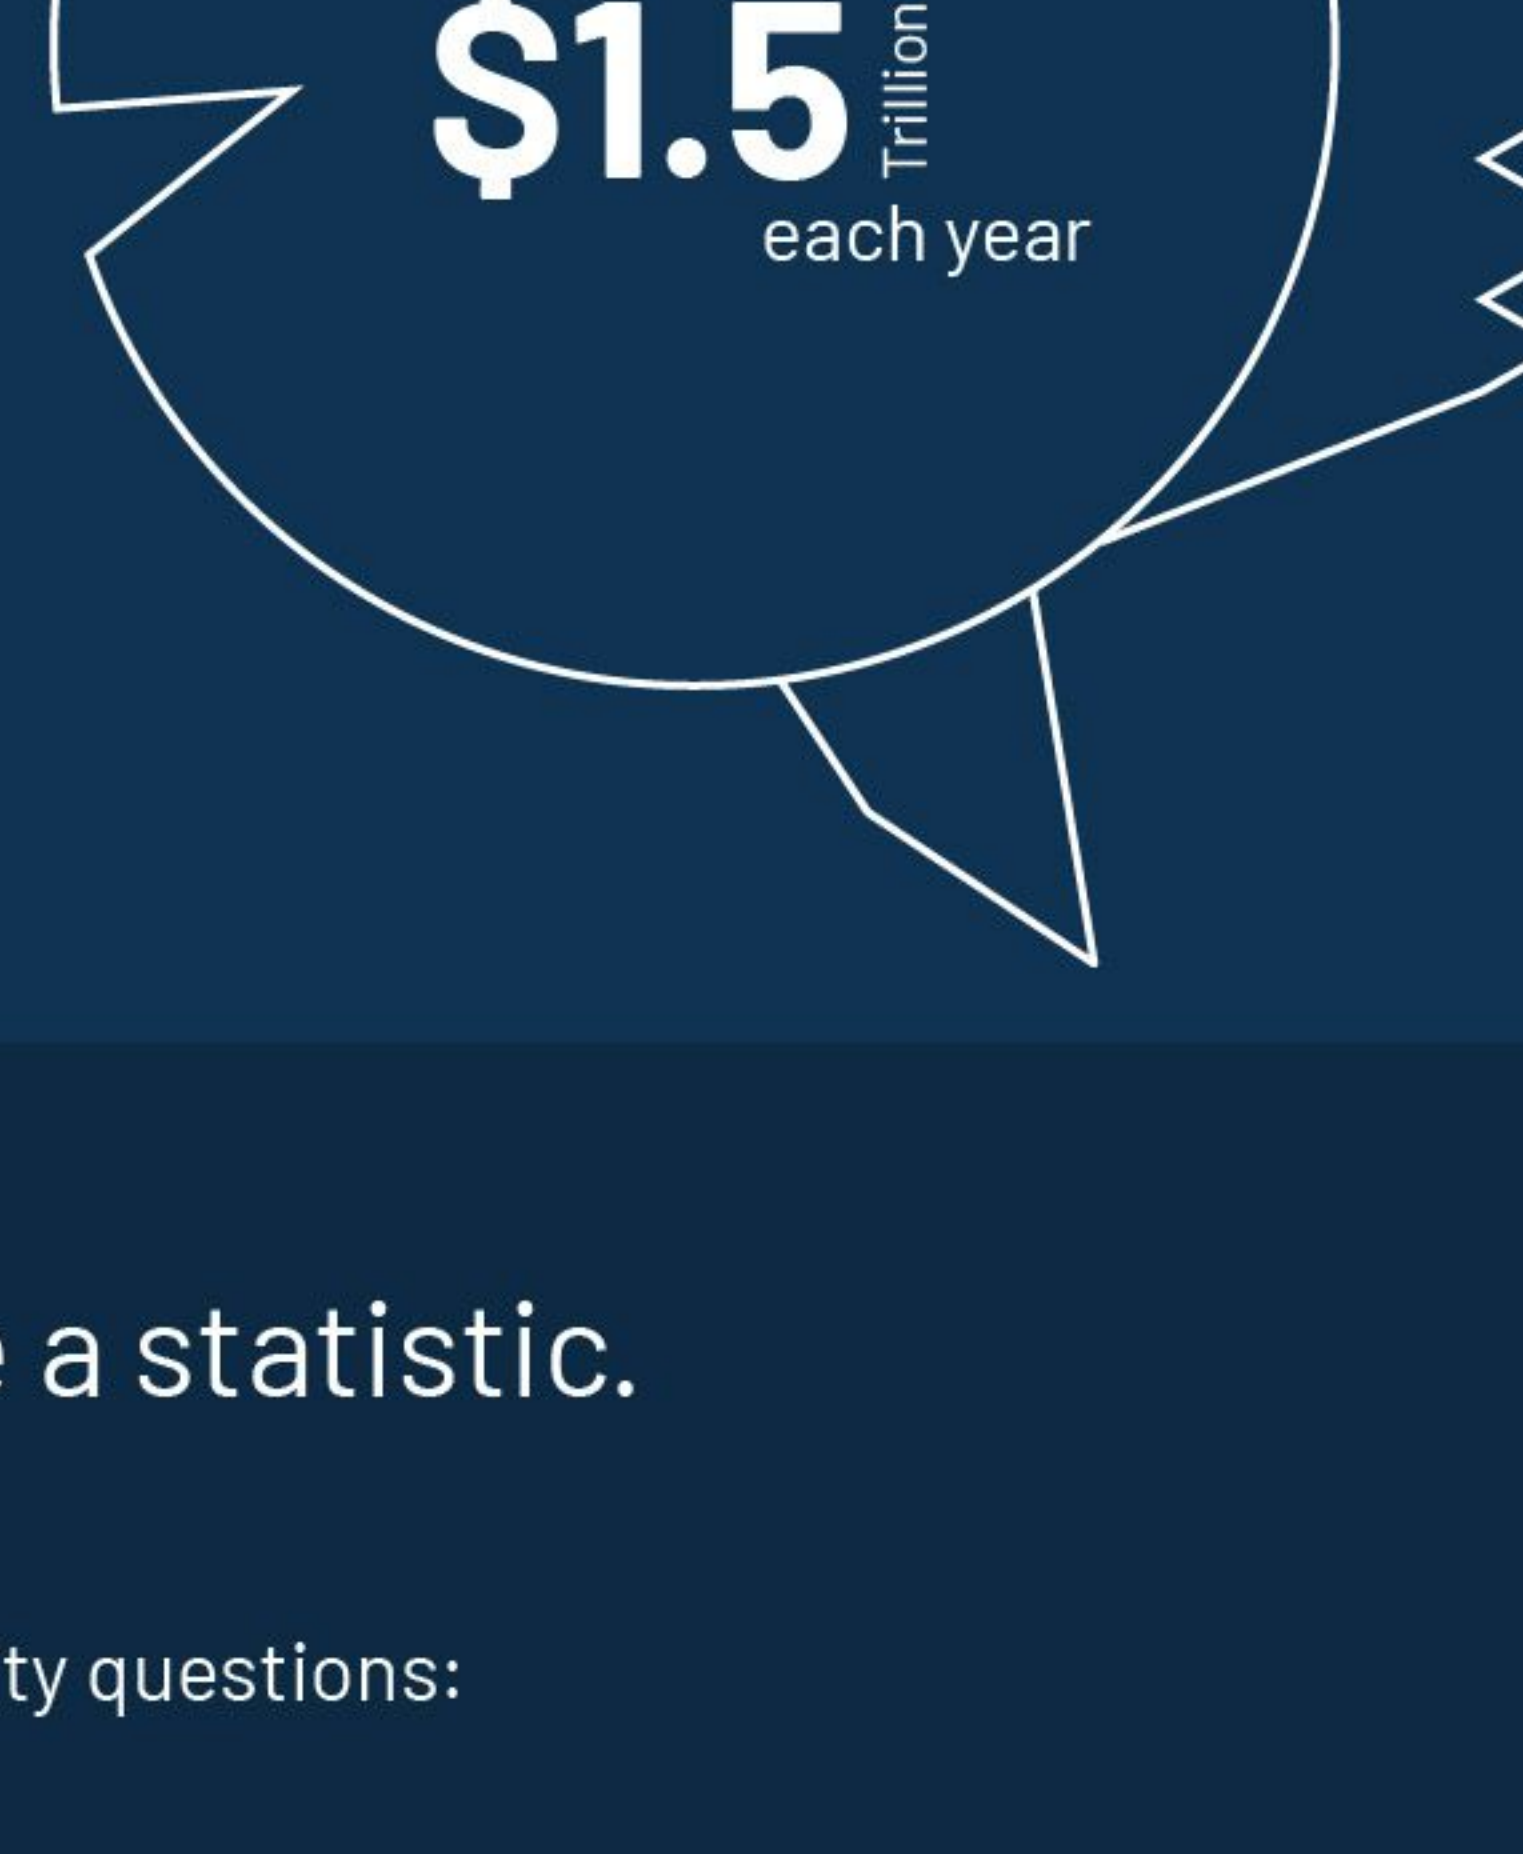

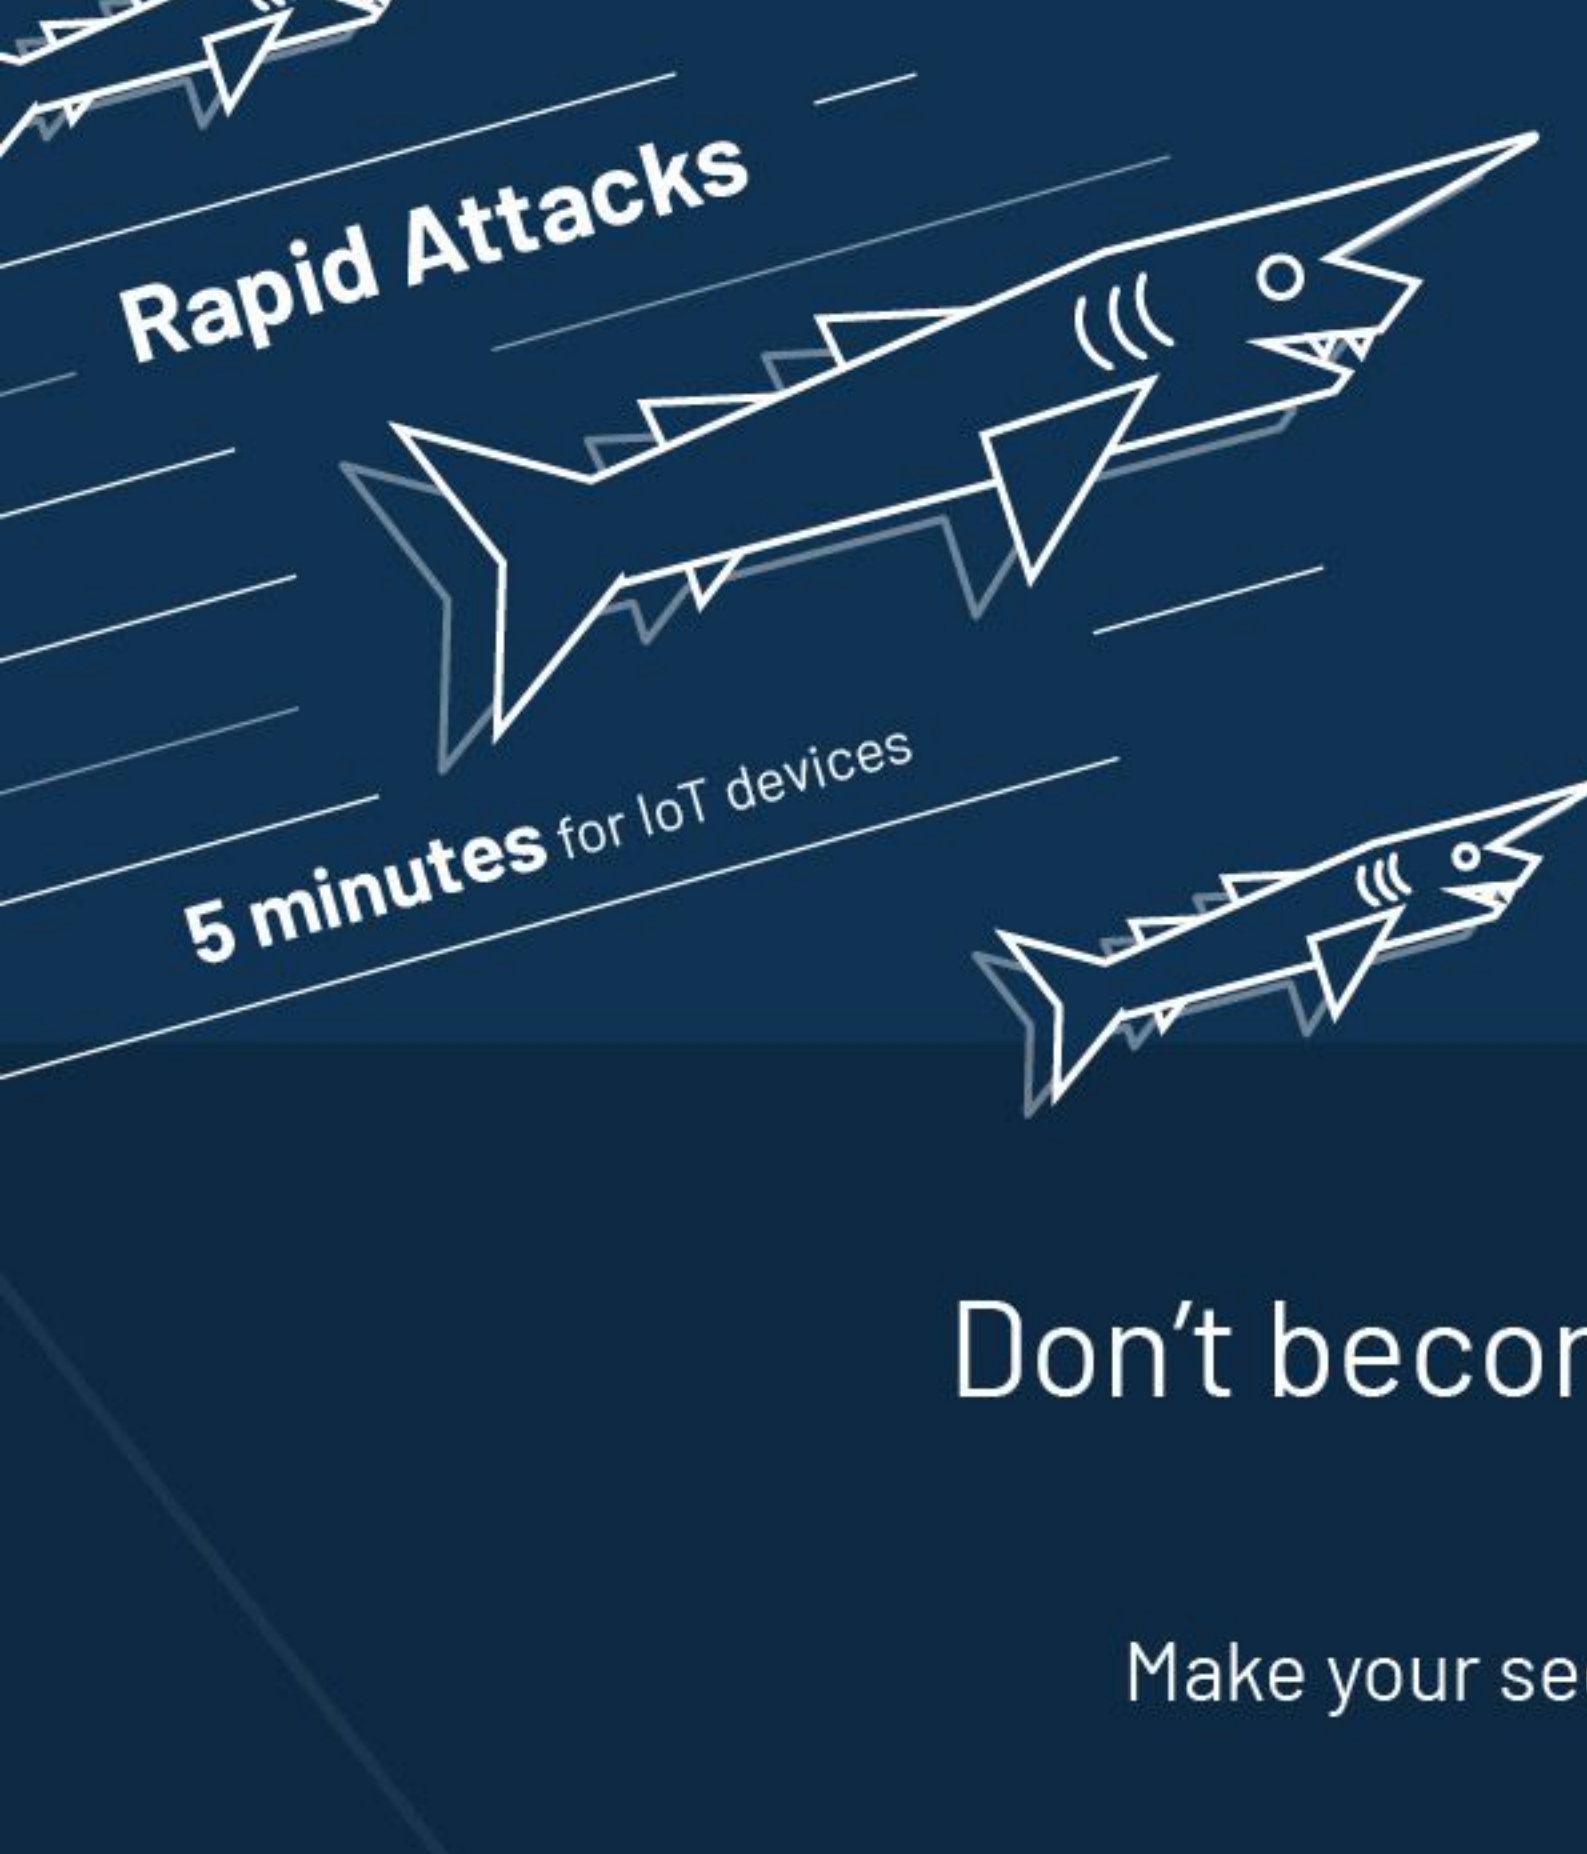

- Technical investigation
- Customer breach notification
- Regulatory compliance
- Attorney fees and litigation
- Post-breach customer protection
- Public relations
- Cybersecurity improvements

Visible Costs

Hidden Costs

A Cybercriminal's ROI

Don't become a statistic.

Make your security questions:

Timeless

Unguessable

Memorable

Enable multi-factor authentication (MFA).

Phone calls

Biometrics

Hardware tokens

Email verification

Soft tokens

SMS/text messages

Time-based code

Security questions

Use Google reCAPTCHA.

Easy on humans. Tough on bots.

Advanced security

Ease of use

Creates value

Use risk-based authentication (RBA).

RBA allows you to:

Identify current user habits

Alert you if user habits change

Require extra ID verifications

Don't let cybercrime sink your profits.

Get advanced data security for your company today.
