

LIMS IN THE CLOUD

In the past, smaller laboratories had to choose between a manual system with spreadsheets or a low cost LIMS solution with limited functionality. Now LIMS vendors are providing full featured LIMS as a software as a service solution to meet the needs of small to medium sized laboratories. However, during the cost analysis process it is still important for the laboratory to develop their requirements and choose the right LIMS solution for their laboratory.

WHAT IS LIMS IN THE CLOUD & WHY IS IT SO AWESOME!?

Unlike, traditional LIMS, LIMS in the cloud or hosted LIMS is a subscription service with LIMS located on the provider's server(s). There is typically a small set-up and monthly fee similar to other subscription based software.

1. There are no licenses to purchase.
2. No onsite hardware and software support needed.
3. And you get feature rich LIMS at a fraction of the cost – no capital cost!

TOP 5 QUESTIONS IN DECIDING IF LIMS IN THE CLOUD IS RIGHT FOR YOUR LAB?

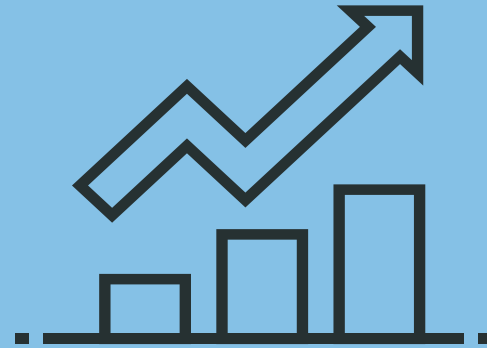

OVERALL REASONS FOR CHOOSING A LIMS IN THE CLOUD SOLUTION

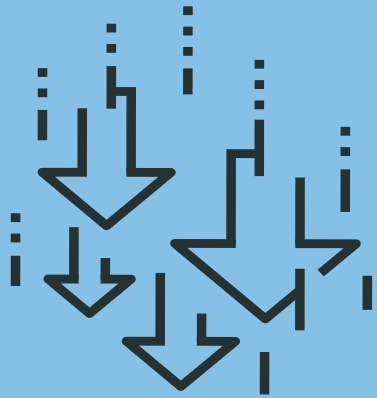

Faster deployment - No servers/database set-up

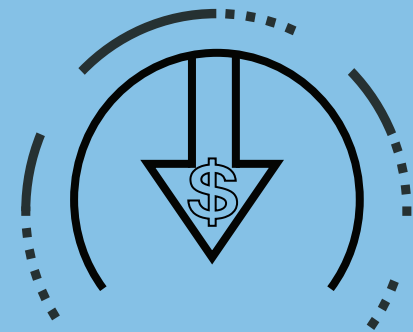

Efficiency - no reliance on internal IT support

Lower TCO (Total Cost of Ownership)

Minimal Capital Cost
