CUSTOMIZED COURSES AND MATERIALS

Thanks to machine learning, now, a branch of artificial intelligence finds patterns in the data, and teachers, with the help of this data, can glean actionable insights from student's performances.

HELPING TEACHERS TO FILL GAPS IN EDUCATION

Artificial Intelligence is transforming classrooms as well as learning. Teachers are able to use technology in order to create customized content for specific subjects and students.

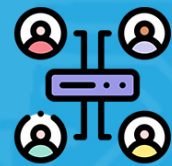

DIGITAL CONTENT

Artificial Intelligence is used to create digital content for students of all ages and levels.

GRADING

Grading is very time consuming and stressful for teachers. AI can help teachers save time

UNIVERSAL ACCESS FOR ALL STUDENTS

Artificial intelligence tools can help make classrooms available to students all around the world. This is helpful for students who speak different languages or have a visual or hearing disability.

SUPPORT OUTSIDE THE CLASSROOM

AI is able to support students when they are at home and having difficulty with homework or studying for a test.
