

Why Choose Myriad360 & Juniper?

Myriad360 is a technology consultancy and integrator that has been recognized for excellence by Juniper Networks in the category of Data Center & Cloud for their ability to develop innovative data center and cloud-integrated network solutions with Juniper's technology.

Looking to improve your network operations and reliability with Myriad360? Juniper's Mist AI is a powerful tool that uses advanced machine learning techniques and was designed with this goal in mind.

wireless access and SD-WAN 3.0, all driven by Mist Al.

AI-Driven Enterprise which includes wired and

Juniper's
experience-first
solution has these
networking
components

and data center facilities with reliable connectivity.

Automated WAN Solutions for linking different offices

overlay management with intent-based automation and assurance.

Cloud-Ready Data Center for simplified underlay/

and recommending solutions. This reduces the time it takes to resolve problems, saving you time and money.

Machine learning for automatically identifying issues

FOCUS ON USER EXPERIENCE Experience is the first and most important requirement for networking

in the cloud era.

When there is a disconnect between network performance and

end-user experience, it tends to get worse as the number of users, devices, and apps grow. Just passing traffic is no longer an acceptable measurement of a successful IT infrastructure.

From the time that consumers first interact with us to when they're

deploying and managing their upgrades, rollouts, and trouble-shooting, we're committed to providing a superior user experience.

Continuously monitor your network and recommend actions to keep it operating at maximum efficiency

REDUCE COMPLICATED WORKLOAD WITH AI

- Identify problems before they happen, so you can automate the resolution of small issues before they become big ones.
- Ensure that users are connected, always.

By predicting and addressing problems before they arise, Mist AI can

REDUCE TROUBLE TICKETS BY UP TO 90%

help you achieve up to a 90% reduction in trouble tickets.

Saves you time and money

Frees up your IT staff to focus on other tasks

Juniper's Indoor Location Services: Provides real-time data across an entire campus

LOCATION SERVICES & LOWER OPERATIONS COSTS

Helps institutions reduce network operating costs while keeping

all users connected.

beacons or manual calibration necessary.

Mist Cloud Architecture:

- Converges Wi-Fi and virtual Bluetooth LE (vBLE) to enable high accuracy location services
- unparalleled user experiencesPatented vBLE technology is quickly deployed with no battery

Access points leverage a 16-element vBLE antenna for

Environmentally-conscious technology that ensures today's actions do not inadvertently limit future social, environmental, and economic choices.

Myriad360 and Juniper Networks Partnership

Myriad360 is an Elite Portfolio Partner with Juniper with Service

Provider and Healthcare Accreditation. Myriad360 brings extensive

Provider and Healthcare Accreditation. Myriad360 brings extensive expertise across entire IT lifecycles, meeting clients exactly where they are in their unique IT journey.

Together, Juniper and Myriad360 create products and services based on a deep understanding of customer needs and the ability to utilize
